With the beginning of the winter season, many of Kuwaitis start to get prepared for camping, they pack their belongings and tents and go to the mainland in order to reserve places for them to camp along with their friend or families away from the city noise and pollution.

You will be surprised when you see the desert is packed with large numbers of campers, weekends and public holidays are opportunities for them to go out with their friends or families to spend a day or two in the desert, as this habit is old for the people of Kuwait. Everyone is waiting for the forthcoming beautiful days. Days that are not repeated all year and we are all keen not to miss the wonderful days from the beginning of the period all way until the end of March.

Finally, we would like to highlight the importance of using safety equipment in the camps, compliance with security conditions and cautions of accidents. Please take care of your children and not leave them without an adult during camping.

How to Avoid Cold & Flu:

Wash your hands frequently:

Wash your hands as much as you can stand, and then some more -- especially after wrapping up a visit with someone who's sick,

Use alcohol-based hand sanitizer:

If you can't get to soap and water, sanitizer can kill cold and flu germs.

Avoid getting close to people who are sick:

For example, don't shake hands.

Keep your surroundings clean:

sanitizes doorknobs, light switches between sessions and let it be a practice.

Keep up a healthy lifestyle:

It's important to look after your own health, do all the things we all should be doing on a daily basis anyway, get good nutrition, don't smoke, and keep your allergies controlled, because if they're out of control, then your upper respiratory tree is already inflamed, which sets it up to more easily acquire a virus.
