

## EID MUBARAK

### »»» A site visit to WJO «««

In the scope of the Executive Management concern for the Company's staff and participating in their different occasions to promote the positivity of the work environment, KGOC Acting CEO & DCEO of Joint Operations Mr. Mohammad Salem Al-Haimer paid a site visit to the WJO Area on the first day of Eid Al-Fitr to congratulate the staff on this holy occasion. During the visit, Mr. Al-Haimer inspected the WJO's

work facilities, discussed the work developments with the staff, and concluded his visit by having lunch with them. He praised their tireless efforts and dedication to maintaining the workflow in various circumstances and occasions in spite of being away from their families, and their endeavour to achieve more operational and productive achievements in the interest of partners in the area and the two brotherly countries.

## During a joint reception with KOC The Executive Management receives Eid Al-Fitr's well-wishers

During a joint reception to mark Eid Al-Fitr, KGOC Acting CEO Mr. Mohammad Salem Al-Haimer, and KOC Acting CEO Mr. Khaled Nayef Al-Otaibi received Eid Al-Fitr's well-wishers from the staff working in KOC and KGOC, in addition to the oil sector's top officials, headed by the KPC CEO Sheikh Nawaf Al-Sabah, KPC's top officials, and the Associates' CEOs and DCEOs. It was held on Sunday, May 8, 2022, at the KOC's Guest House-Ahmadi.

The Executive Management exchanged congratulations with the attendees, extending congratulations and blessings to HH the Amir, HH the Crown Prince, and the executive and legislative authorities, hoping Allah Almighty would bring back such happy occasions to the country with prosperity, security, and stability under its wise leadership.

At the end of the reception, CEOs and DCEOs thanked the well-wishers, hoping the next phase of the oil sector and all its subsidiaries will be marked with outstanding achievements through their constant pursuit towards excellence in performance.

## KGOC Operational Achievements during 2021

During the year 2021, KGOC continued to operate its activities and business in the Head Office and Joint Operations area, taking all efforts to ensure that the operational operations are not affected by health conditions. Financial Year 2021 has witnessed a great deal of effort and achievements made by all the Company directorates and organizational groups.

- The first of the Company's achievements is its success in launching a pipeline to transport the State of Kuwait's share of natural and liquefied gas, estimated at 11 MCF of light gas, 29 MCF of sour gas and 6,000 BPD of liquefied gas, produced from the Divided Zone shared with the Kingdom of Saudi Arabia in KJO to the local oil facilities, through a 100 kilometer-long onshore and offshore pipeline between the State of Kuwait and the Kingdom of Saudi Arabia, aimed at utilizing the share produced in generating power locally.
- Furthermore, it reached an agreement with the partners in the WJO Area about the joint assessment and identifying the wells list waiting for drilling for the five-year plan 2022-2026.
- Completed the study of the Wafra fields development plan in the identified new expansion areas and drilling wells within the current development areas.
- In order to achieve the optimal utilization of the potential value of gas, Khafji New Gas Transit 12" Pipeline from KJO to MAA Refinery and KNPC achieved 100% completion rate in Khafji Area, and started transporting lean gas from Khafji to Kuwait. Accordingly, the average production of KJO has risen from 100,000 BPD of oil to 160,000 BPD.
- In addition, it initiated the engineering works and design for the construction of the second phase of connecting the project with the KOC's pipeline.
- Completed 100% of the conversion of Khafji Dry Dock (OTB-14) to the north to protect the KGOC's gas pipelines and exports, and to modernize the pipeline route in Khafji and the navigation canal line.
- Agreed with the partner about the identification of the proposed alternative for the Dorra Offshore Field Development Project, and formed an integrated team to discuss and develop the final steps to move the project forward.
- Developed a draft of the short- and long-term Memorandum of Understanding between KOC, KGOC, and the Saudi Arabian Chevron (SAC) to export the full surplus gas shares of WJO.
