

Launching the final phase of the "Barwa" Project

On Thursday, September 1, 2022, and in the presence of the DCEO of Finance & Administration Affairs, Mr. Nayef Al-Anezi, the IT & Services Group launched the third and final phase of the "Barwa" Archiving and E-messaging Project. Mr. Al-Anezi commended the IT Team's effort in this project and the protection it provides for information, data, and users to move towards the future with technology that keeps pace with the times and users.

The event, which was organized at Ahmed Al-Jaber Oil & Gas Exhibition and was attended by the Head Office's managers and team leaders, reviewed the launching phases of the "Barwa" Project. Eng. Ahmad Safar, Team Leader of IT, spoke about his team's journey in this project, explaining that the event aims to accelerate the adoption of the technical shift provided by "Barwa" to users and start using it after they finish training.

Organized by the Personnel Administration & Industrial Relations Team

"My Way to Professionalism 2" Workshop

Under the auspices and in the presence of the DCEO of Finance & Administration Affairs, Mr. Nayef Al-Anezi, and complementing the efforts of the HR Group to develop and reinforce the employees' skills, the Personnel Administration and Industrial Relations Team, in collaboration with INJAZ Kuwait, organized "My Way to Professionalism 2" Workshop, on September 21 & 22, 2022 at the PTC Auditorium.

The workshop dealt with a variety of important topics in professional

and daily life, including leadership skills, leader's qualities, and time management, as well as the optimal interaction with teams. The lecturer, Mr. Adel Sadeq, explained the topics of the meeting, theoretically and practically, especially how to manage time and priorities, oral and written communication skills in professional correspondence, the problem-solving mechanism, and the process of taking the appropriate decision. Furthermore, he spoke about teamwork, team leadership

requirements, and self-assessment to improve performance.

It should be mentioned that INJAZ Kuwait is a non-governmental and non-profit society founded in 2005 to prepare Kuwaiti youth and qualify them with the information and skills needed to become productive elements and involved in the local economic development, through training courses related to business management and leadership areas.

The organization of the workshop came as an investment in the success of the "My Way to Professionalism 1" Workshop, which was organized last year and attended by large number of the Company's employees from different worksites. The second workshop witnessed a high turnout and interaction of colleagues who have expressed their appreciation for organizing it, the content, and the way it was presented.

Organized by the Corporate Planning Group

A workshop about "Technical Solutions for the Oil Industry"

Under the auspices of the DCEO of Finance & Administration Affairs, Mr. Nayef Al-Anezi, the Corporate Planning Group organized a workshop in which it hosted Afkar Ventures to present its technical solutions for monitoring oil wells, fields and sites, and techniques for analyzing data, in addition to providing accurate and detailed reports in record time.

During the workshop, which was held on Wednesday, August 31, 2022, at Ahmed Al-Jaber Oil & Gas Exhibition, and attended by several of the Head Office's managers and team leaders, Afkar Ventures' representatives, the CEO, Mr. Ziyad bin Hamad, Projects Manager, Mr. Ahmed Al-Dakhil, and others, presented their services, technologies, and consulting to reinforce the effectiveness and quality of business, and optimizing

costs and human effort in the oil industry.

State-of-the-art field surveillance technologies through satellites, and analyzing site data to provide forecasts for the future and reinforce the effectiveness and work quality at different levels have also been presented. It should be mentioned that Afkar Ventures, based in Dubai, operates in the Middle East's energy field to assist large and emerging companies to expand and lead in the fields of energy technology and the oil industry.
