Dear colleagues,

It gives me great pleasure to communicate with you through this periodic space to discuss the visions and developments of common interest. As you are aware, the growing interest around the world about the environment has become one of the most necessities, and it is not just a rhetorical to attract attention, due to its close connection and great impact on all fundamental aspects of societies.

This is reflected in the direction of many countries and major organizations, in which the intended objectives are no longer limited only to reduce the environmental burden, but also to depend on completely new means to eliminate the causes of any negative environmental impact on soil, air or water.

This objective is confirmed by Kuwait State's development plan, and the strategic directions of KPC and its subsidiaries that we are working to achieve as part of this large entity. KGOC's interest in the environmental aspect was shown by various initiatives and achievements, including the support of the environmental voluntary activities, and the participation in a campaign to protect the coral reefs in Kuwait Jon (Bay) and clean Kuwait beaches.

These initiatives were marked by voluntary participation by many of our staff, which confirms our advanced awareness regarding the importance of the environmental issues, and our active participation to implement the environmental aspect's visions and directions to raise awareness about them outside the Company's community.

We are looking forward to working together for more achievements at all levels for a brighter and more distinctive future.

Abdulnaser Y. Alfulaj
Chief Executive Officer

In a joint ceremony with KOC KGOC receives Eid Al-Adha's well-wishers

During a joint reception ceremony with KOC held on Sunday, 26th August 2018, in Ahmadi Guest House, Mr. Abdullah M. Al-Shammari, KGOC DCEO of Finance and Administration Affairs, received Eid Al-Adha's well-wishers of HO & KJO, along with CEOs of the Associates and a number of the oil sector's officials.

Mr. Al-Shammari and KOC's Executive Management exchanged congratulations with the attendees which also included representatives from ministries and government authorities, wishing welfare to everyone and asking Allah Almighty to return this occasion with more prosperity, security and stability to the country under its wise leadership.

In the presence of the Executive Management during a ceremony organized by "KOC"

Honoring the KGOC's Strategic Planning Team for participation in the formulation of 2040 Strategy

In the presence of Mr. Abdullah Al-Shammari, Acting CEO, and Mr. Saeed Al-Shaheen, Acting DCEO of Planning and Services, colleagues from Strategic Planning Team, headed by Mr. Fahad Al-Ajmi, were honored during a ceremony held by KOC to honor those who participated in formulation of 2040 Strategy of exploration and upstream sector from the producing companies (KOC, KGOC, and KUFPEC). The ceremony was also attended by top manage-

ments and senior officials from the three companies involved in the formulation of the Strategy.

It is worth mentioning that the Corporate Planning Group's Strategic Planning Team, along with large team from the Associates working in the production sector, participated in the formulation of this important Strategy that shapes the features of the exploration and upstream sector and one of the most important features of Kuwait oil industry future.

To mark the Saudi National Day KGOC receives the arrivals through Nuwaissib Land Port

In a gesture refers to the depth of the bilateral relations between Kuwait State and Kingdom of Saudi Arabia, KGOC shared Saudi citizens their celebrations of the 88th National Day, in which Public Relations and Media Relations teams received and welcomed the arrivals from the Kingdom through Nuwaissib Land Port in conjunction with those celebrations.

The Public Relations' staff received Saudi citizens and visitors of Kuwait coming from the Kingdom and presented them the flags of the two countries and souvenirs, congratulating them on this occasion, and wishing them a good stay in their second country Kuwait, permanent stability and prosperity of the Kingdom.

The visitors expressed their appreciation for the KGOC's distinctive initiative, which emphasizes the interdependence between the two brotherly peoples and reflects the meanings of unity between them.

It is worth mentioning that the Kingdom of Saudi Arabia celebrates its national day on September 23rd yearly, in which that day witnessed the unification of all Saudi lands under the name of Kingdom of Saudi Arabia by the founder King Abdulaziz Al-Saud in 1932.

In conjunction with the World Environment Day

KGOC'S employees volunteer to clean up Shuwaikh Beach

Proceeding from the environmental efforts adopted by the Company towards the community in which it exists and operates, and in conjunction with the World Environment Day, Public Relations Team, in cooperation with Kuwait Dive Team, organized an event to clean up Shuwaikh northern beach (Free Zone) witnessed a wide participation from the Company's staff.

About 50 volunteers of different ages, from KGOC, Kuwait Dive Team and other local agencies have participated in this initiative, in which they cleaned up the beach and removed a large amount of waste from this area, which is an assembly point of waste due to movement of waves and winds.

Awareness publications about the damage of various types of waste to the marine environment and the period required for them to degrade have been distributed to the Company's employees, in order to raise the environmental awareness and reducing the burden of waste on the environment.

Through a working paper KGOC participates in the Enterprise Risk Management Middle East

Represented by colleagues Abdulaziz Dashti, Manager Risk Management Group, Mohammad Al-Hamdan, Manager FDG in WJO, and Besma Al-Musallam, risk analyst, KGOC participated in the Enterprise Risk Management Middle East Conference which was held in Dubai from 25th to 27th September 2018.

Mr. Dashti participated in this distinctive annual regional event through a working paper entitled "Understanding Risk Appetite".

Also, he participated in a discussion session about the risks related to price volatility, work in the oil sector, and mechanisms to deal with such risks.

Organized by Fields Development Group (Wafra) A workshop in cooperation with Halliburton International

In the scope of exchanging the expertise on the latest global technologies that benefit the work quality, Fields Development Group (FDG) of WJO organized a workshop in cooperation with Halliburton International, on Thursday, 18th October 2018, at Jumeirah Hotel.

The workshop was attended by Acting Manager of FDG Mr. Talal Al-Anezi and a group of WJO's staff, in which the latest technologies used by Halliburton were presented, especially those related to wells' safety and the best ways to maintain them.

It is worth mentioning that Halliburton is one of the global leading companies in the energy field, as it offers services in exploration, geological data management, supporting ways to improve production, and other services.

IT Team participates in IT Community

KGOC IT Team participated in the third meeting of KPC and its subsidiaries' IT Community, which was also attended by officials and employees of IT departments in the oil sector. It was held at Hilton Hotel and Resort.

The meeting was attended by Mr. Anwar Al-Sharqawi, Manager of Information Technology & Services Group, in addition to a number of IT Team staff, in which KGOC's experiment was presented within the "Lessons Learned Workshop" of IT departments at the level of KPC's subsidiaries. As well as the Company's application of innovative systems such as Dashboard, LC Directives System, lessons learned from that experiment and its positive results.

Mr. Al-Sharqawi also spoke about the importance of cooperation and innovation among the

IT teams, internally and at the level of the oil sector, which helps in overcoming many technical problems and obstacles to save effort, time and cost, increases the companies' productivity and improves performance, which is the approach followed by KGOC's IT Team.

Organized by Risk Management & Insurance Team Risk Assessment Workshop 2018

In efforts to implement the Company's objectives aimed at achieving the highest levels of quality and excellence in performance, and to reduce risks and prevent their occurrence, Risk Management & Insurance Team organized the annual workshop entitled "Risk Assessment 2018", in which Quality Assurance Team participated to explain the requirements of the new risk management standards within the ISO 9001: 2015 standard.

Colleagues Besma Al-Musallam, risk analyst, and Hamad Al-Modires, Senior Quality Assurance Engineer, presented the workshop, in which Al-Musallam explained all that related to risks, their definition, their impact on work quality, the assessment of each risk and its consequences, and the mechanism of adding and surveying the potential risks

and their connection to the source of risk. She indicated to the need to assess risks for each procedure implemented in the Company to implement it with the highest quality.

Al-Modires explained the requirements of implementing the new standard of Quality Management System ISO 9001: 2015 and its connection with risk assessment, pointing out that there are about 216 procedures within the Company's Quality Management System, in which their potential risk must be examined and assessed.

The workshop was attended by all risk coordinators from different teams to be familiarized with their role regarding the potential risk in the work procedures applicable in their teams, and how to deal with them and report to the Risk Management Group.

In the presence of employees from KGOC

Presenting the experiment of Kuwait Integrated Digital Field (KwIDF) Project

In the scope of exchanging the best practices and generalizing successful experiments among the oil sector companies, employees from the Company's HO & KJO attended a presentation about KOC's experiment in implementing the (KwIDF) technology. It took place in Kuwait Center for Intelligent Field of KOC.

The presentation explained in detail the KOC's experiment since the launch of the project, and the stages of implementing and applying this advanced technology by KOC. It also explained the accurate and instantaneous information provided by this technology about the reservoirs and wells in order to manage them efficiently.

In the Company's HO

Seismic Vibrator Vehicle Exhibit

Asset Management (Khafji) Group & Asset Management (Wafra) Group organized Seismic Vibrator Vehicle Exhibit in the Company's HO, opposite (A) Building.

Colleague Mohammad Rajab Hussain, Senior Geophysicist of Exploration & Fields Development (Khafji) Team- HO, explained the uses of the vehicle, the used waves, how it works, and the accurate information it provides about the earth's layers in the onshore areas to be surveyed for hydrocarbon exploration.

To familiarize the employees with this distinctive oil landmark

Guided visits to Ahmed Al-Jaber Oil & Gas Exhibition

KGOC PR Team organized several guided visits to KOC's Ahmed Al-Jaber Oil & Gas Exhibition in order to familiarize the employees with one of the most important oil and cultural landmarks in the country, as an outstanding achievement of one of the Associates.

The visits included tours in the Exhibition's nine halls which include explanations and presentations about the oil industry and all that related to it, from the beginning of the local oil industry, storage, and its various products, which are not limited to fuel and electricity generation, but also extends to enter in consumer products, vehicles and many other.

The employees appreciated the Company's idea and granting them the opportunity to visit such distinctive oil and cultural landmark, which is a destination and a place for the whole family due to variety and simplicity of the information it provides about the oil industry as the cornerstone of the local economy.

Organized by Risk Management & Insurance Team An awareness session about the New Travel Insurance System

In efforts to raise the awareness of the Company's employees about the insurance systems they are subject to, and the benefits provided by those systems, Risk Management and Insurance Team organized an awareness session about the New Travel Insurance System in (F) Building's meeting room.

The session, which was attended by many employees of the Company's HO, was opened by introducing the new system, which is under the umbrella of the KPC and its subsidiaries' health insurance system of paying and refund. The meeting also clarified the advantages and claim procedures provided by the new system, which include filling out a specific form and attaching the required documents.

During the session, the Gulf Insurance Group representatives explained in detail the contents of the document and the advantages it offers, and how to claim some of its advantages after returning from travel. The questions and inquiries of the attendees were answered at the end of the session.

Represented by Corporate Planning Group KGOC participates in the Oil Sector's 1st Planning Community Expertise

KPC International Marketing Sector organized the Oil Sector's 1st Planning Community Expertise which witnessed the participation of representatives from the planning groups of KPC subsidiaries. It took place in the Oil Sector Theatre. KGOC was represented by Corporate Planning Group through Sheikh Salem Salman Al-Sabah, Senior Planner, who delivered a presentation explaining the nature of the Company's work, its role in the operations of hydrocarbon resources utilization in the joint area, and the Group's role in striving to mark the Company's successes in line with KPC's Strategic Directions.

In the presence of many employees The participation in the second level of "Lean 6 Sigma" Program

In efforts to improve the work quality and reinforce all that contributes to achieving this objective, KGOC Quality Assurance Team, in coordination with Petrochemical Industries Company represented by Dr. Saud Al-Majidi, Team Leader Operations Development, organized the second level of "Lean 6 Sigma" Program, from 14th to 18th October 2018, at Boubyan Club.

Colleagues Moataz Behbehani, Ali Bukhamseen, Amar Al-Sarraf, Latifa Al-Essa, Tahani Abdulla, Sara Murad, and Shuaib Shuaib participated in

the first week of the Program in order to be familiarized with its objectives which are about the development of the Company's internal procedures and processes.

It is worth mentioning that "6 Sigma" methodology is a management methodology aims to develop performance through a unified and integrated range of highly effective techniques and tools, while "Lean" methodology focuses on speed and effectiveness of performance, and minimizing waste resources.

an enthusiastic atmosphere

The Launch of KGOC First Bowling Tournament

In line with the Company's objectives to create a recreational atmosphere for its employees and reinforce friendly relations among them, PR Team organized KGOC First Bowling Tournament at KOC's Multi-Purpose Hall. It took place on Friday, 21st September 2018.

The tournament was attended by a large number of the Company's employees and their children, in which it witnessed an enthusiastic competition among the participants of the three categories (men - women - children) to win the first places. The winners of the first and second places in each category were honored by Mr. Ahmad Thaher, Team Leader of Public Relations Team.

The participants expressed their appreciation for that idea and good organization, looking forward to participating in such events in the future.

Organized by PR Team

Abdullah Al-Salem Cultural Center's Visits

In efforts to entertain and benefit the Company's employees, PR Team organized several visits to Abdullah Al-Salem Cultural Center, which is one of the most important cultural, civilizational and entertainment landmarks in the country.

Many employees and their children took part in the various visits. The colleagues in PR Team coordinated these visits and distributed tickets to the employees and their families, who expressed their appreciation for the amazing visit to such place that includes exciting and useful illustrative facilities and means which use the latest technological means.

HSSE's New Security Access Control System

HSSE Team launched the soft opening for security Access Control System in the Company's buildings-HO, according to the following instructions:

- Doors will be magnetically locked and only unlocked after the ID card is swiped.
- Swipe your card on readers by the door to enter or leave.
- The intrusion detection system will sound alerting others that there is an intruder.
- Do not allow others to enter/exit through your own ID card.
- If you swipe your card and allow other to enter without swiping their cards you will be held responsible for violations.
- If your card does not work, please call or email Security for assistance via HSSE.SecurityTeam@KGOC.com or call: 238-54671

Fruitful environmental cooperation with “Omniya” Project It saves about 10670 kW of electric power

Proceeding from its permanent keenness to promote environmental awareness and contribution to protect the environment through cooperation with the various agencies concerned in this regard, KGOC

Yousef Al-Najjar

Mohammed Safar

line with the Company’s environmental objectives and the efforts of HSSE Team to implement initiatives benefit the environment and enhance the public environmental awareness. He thanked colleague Yousef Al-Najjar, Chief Environment Engineer, for his efforts in this regard and constant coordination from the very beginning with the project team.

He stressed that the initiative achieved tangible environmental results, where the Company saved plastic waste equivalent to 10670 kilowatts of electric power. In addition to providing 42 cubic meters of landfills, in which all employees in the Company-HO contributed to the continuation of this successful cooperation and to expand it in all Company’s worksites to reduce the burden of waste on the environment, recycling and use them in various forms.

HSSE Team cooperated in March 2017 with “Omniya” Environmental Project, which is one of the voluntary projects aimed at raising the environmental awareness towards the importance of sorting and recycling waste in order to activate the Environment Protection Act realistically and create a new industrial sector in the country consistent with the development plan.

Mr. Mohammed Safar, Team Leader of HSSE, explained that the Team strived to implement this distinctive cooperation with “Omniya” Project team out of its belief in the vision of youth potential implementing the project which is in

Risk categories and examples

Risk categories are defined risk groupings that help organize consistent identification, assessment, measurement, and monitoring across risks. Using consistent risk categories across an enterprise enables risks to be aggregated to determine their overall impact to the organization.

KPC has adopted the following risk categories in its “standard language” for the ERM Program. Categories are designed to be comprehensive. There are examples provided for each risk category.

- 1. Operational Risk**—the risk arising from inadequate physical infrastructure (asset failure), risk control or risk infrastructure (process failure).
Examples: execution, delivery, and process management; clients, products, and business practices; systems failures; internal fraud; external fraud; computer & information security, data security, employment practices and workplace safety; and damage to physical assets.
- 2. Credit Risk**—the risk arising from the inability of a counterparty to meet a payment or delivery commitment.
Examples: client default, partnership, sovereign risk, and collateral.
- 3. Market Risk**—the risk arising from unexpected changes in market supply, demand, or price.
Examples: changes in the OPEC limitations, market demand, market prices, and KPC’s capacity to meet market demands.
- 4. Legal Risk**—the risk arising from contracts or other arrangements that are not enforceable through available means.
Examples: inadequate documentation, regulatory prohibition, legal contract, and litigation.
- 5. Strategic Risk**—the risk arising from an organization’s inability to formulate and/or ex-

ecute a successful business strategy as well as manage performance.

Examples: strategy, planning, budgeting, competitor, regulatory and economic environment, joint ventures, and new businesses.

- 6. Reputation Risk**—the risk arising from changes in public opinion that impact earnings or access to capital.
Examples: brand, press relations and corporate communications.
- 7. Environmental Risk**—the risk arising from noncompliance with local, regional, or federal environmental laws or regulations.
Examples: oil spill, excessive flaring.
- 8. Financial Risk**—the risk arising from deviation of business financing costs from original estimates.
Examples: rising cost of capital, labor, and materials.
- 9. Health and Safety Risk**—the risk arising from noncompliance with or lack of health and safety regulations, policies, or procedures.
Examples: plant traffic accidents, loss-time accidents, work-related injuries, and fire hazards.
- 10. Human Resources Risk**—the risk arising from inadequate human resources or inappropriate use of available resources.
Examples: inadequate qualification of candidates during recruiting process, loss of key personnel to competitors due to salary increases.
- 11. Information Systems Risk**—the risk arising from inadequate information technology resources or inappropriate use of available resources.
Examples: IT control system fail

CEO Mr. Abdalnaser Alfulaij, and DCEO of Finance and Administration Affairs Mr. Abdullah Al-Shammari, in addition to a number of group managers during attending the first event of the Business Performance Excellence Association for the financial year 2018-2019, which was organized by KOC in Ahmed Al-Jaber Oil & Gas Exhibition and attended by many of the oil sector's top officials.

The participation of Risk Management & Insurance Team, headed by Mr. Materan Al-Shammari, and colleagues Besma Al-Musallam and Abdulaziz Hasan, risk analysts, in the meeting of Enterprise Risk Management Community, which was also attended by a number of risk management's staff of KPC & Associates.

A participation in the workshop organized by Upstream Center of Excellence (CoE), which includes KOC & KGOC KJO. The workshop, which was entitled "Offshore Facilities, Operations & Related Potential

Challenges" was attended by KGOC representative for Upstream CoE Mr. Mohammad Al-Hamdan, Manager FDG in WJO, and a number of Assets Management (Khafji) Group's staff.

Colleague Zaid Al-Khateeb, from Risk Management & Insurance Team, during his participation, as an official representative of Kuwait State in the Youth Committee of the World Petroleum Council, in a meeting with the Deputy Minister of Oil in Astana, Kazakhstan. They discussed the outlook of young people in the oil and gas

sector and the challenges facing them. As well as his participation in several meetings with the Committee to discuss projects that achieve the World Petroleum Council's objectives, and prepare for Youth Forum in Saint Petersburg – Russia, to be organized in 2019 and the Congress Conference to be held in Houston in 2020.

Colleague Mohammad Safar, Team Leader HSSE, participated in the "Emergency Management for Oil & Gas Summit 2018" which was held in Singapore, through a working paper titled "Compliance of Oil Sector with Local Authorities during a Crises Situation". He also participated in a panel discussion about the standards and requirements for dealing with government authorities during crisis management.

Assets Management (Wafra) Group organized a workshop about WJO's assets protection practices at KOC's Guest House.

PAINKILLERS...

... PROS AND CONS

Every one of us may suffer from annoying pain from time to time, and then we often resort to painkillers even before visiting a doctor. We must know that painkillers have side effects, especially the strong ones or if they are taken for long periods.

Here, we will speak about the most important information that we have to know when dealing with various types of painkillers.

Before taking any painkillers, we must ask ourselves if we really need it or not? It is important to determine the intensity and the duration of the pain, as many types of pain may soothe on their own. There is no need for painkillers, if you are able to endure pain for a few days.

After that we must be aware that our feeling of pain has real causes that we should not ignore by taking painkillers alone, as pain is not an illness; it is a sign of illness, which is the true source and cause of suffering. Instead of taking painkillers to relieve pain temporarily, it is better to consult a doctor to identify and cure the illness.

We should avoid taking medicines that are not prescribed by a doctor to cure a specific disorder in our bodies. Taking medicines without prescription is very serious habit, especially if taken with any other medicines. An overdose of painkillers can be fatal, so consult a doctor to recommend you the suitable painkiller and doses.

Painkillers, like many other medicines, have side effects such as digestive

system problems, constipation, dizziness, tiredness, low blood pressure, heart attacks and other complications of varying severity depending on each case, so it is important to know all the side effects of painkillers before using them.

The addiction to a certain type of painkillers is one of the serious side effects that we should be aware of when dealing with such medicines. But, in some cases this addiction is just a dependence and habituation from the patient himself on a type of painkillers, which can infect many people; the patient continues to take painkillers even after the cessation of pain. Here you must consult a doctor to get rid of that psychological addiction to painkillers.

Also, we should know that painkillers can damage the body's organs if taken, especially strong types, for a long period because they contain strong chemicals that are difficult for the body to crack and get rid of them.

On the other hand, painkillers are important and necessary in many cases because they provide relief, especially after surgery or in the case of bone pain, so when a doctor describes a painkiller, it suits the dose that will give maximum pain relief.

Therefore, some practices, such as doubling the dose, reducing the time between doses or merging different types of painkillers, will not guarantee more pain relief or a faster effect. Thus, if you take a painkiller and it does not relieve you enough, consult your doctor, because you may need to change the medicine.

Kuwait's Rulers

The Seventh Ruler
The Late Amir

**Sheikh Mubarak
Al-Sabah**
"Mubarak Al-Kabeer"
(1896- 1915)

The Late Amir Sheikh Mubarak Al-Sabah, may God rest his soul, is the whole of Kuwait, who promoted its position above its companions, and spread its reputation in all other countries. He was one of the great princes of the Arabs in mettle, pride, mind and opinion.

Among the most important events during his rule:

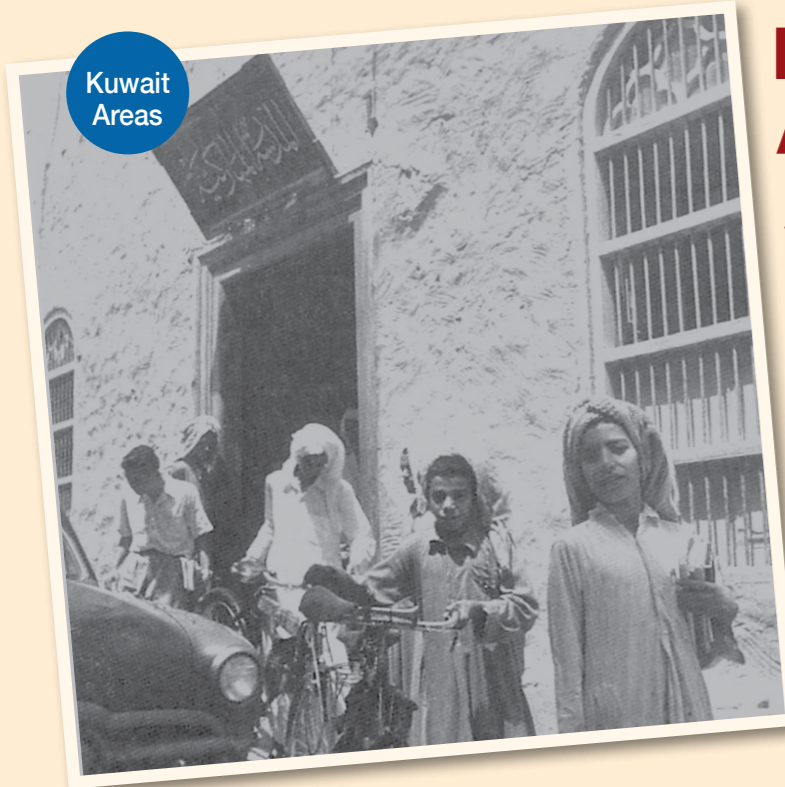

- The choice of Kuwait as a place for a meeting held by Hardinge, Governor of India during the First World War, to test the intentions of

Arab rulers towards Britain, in which Sheikh Mubarak was keen to assert Kuwait's independence in these circumstances.

- The Convention of 1899, which highlighted the independent entity of Kuwait Emirate.
- Establishing the northern borders of Kuwait Emirate and defeating all attempts to cut off any parts of them, especially Warba and Boubyan islands through the Convention of 1913.

Mubarak Al-Kabeer & Al-Mubarakiya

These two areas were named after the late Sheikh Mubarak Al-Sabah, who was also named "The Lion of the Arabian Peninsula" and "Mubarak Al-Kabeer". His era witnessed many achievements and landmarks in Kuwait history, including the establishment of the first school in Kuwait in 1911, which is Al-Mubarakiya School, the establishment of the first hospital in 1910, known as the American Hospital, the raising Kuwait's first flag; the red one which is mediated by "Kuwait" word, and opening the first post office in 1915, which was in the British consulate.

Think of your health, Quit smoking

New Renewable Energy Projects and Smart Networks Strategy in Saudi Arabia

KSA Ministry of Energy, Industry and Mineral Resources announced the preparation of new projects under the Renewable Energy Program, under the direction to study the feasibility of electrical interconnection with some neighboring countries. It pointed out that it is working to complete the “smart network strategy and its applications to ensure the replacement of all mechanical counters with electronic ones”.

As well as the implementation of a project to change the electricity distribution effort to implement the Kingdom’s striving to rationalize consumption, reduce operational and capital expenditures, and work to develop the renewable energy sector as a tributary of electrical power mix and economy pillars.

The Ministry pointed out that it has launched the program of the Custodian of the Two Holy Mosques for Renewable Energy in the Kingdom, which aims in the short term to add 3450 MW of renewable energy and proceed to expand its projects to reach 9,500 MW at the end of 2023, whether by expanding the exploitation of renewable energy sources, or localization of industries and its associated services.

Qatar Petroleum to operate offshore oil field next year

Qatar Petroleum announced that it will manage and operate the Eastern A’ad (Eastern Qubba) offshore oil field immediately after the completion of the development and production partnership agreement signed with “Occidental Qatar Petroleum Limited”.

Qatar Petroleum and Occidental Qatar signed the Development and Production Sharing Agreement in 1994 to develop the offshore field discovered in 1960, located in Qatari waters 85 km east of Doha.

This step confirms Qatar Petroleum’s high technical ability to optimize the management and development of oil and gas fields in order to achieve the highest value for the country.

ADNOC to establish new pipeline to transport sulfur granules from “Shah Field”

ADNOC Sour Gas, a subsidiary of Abu Dhabi National Oil Company (ADNOC), has confirmed that a new pipeline is being constructed to transport liquid sulfur produced from the company’s “Sour Gas Shah Field” as planned in an effort to increase the value of the company’s resources.

The additional pipeline aims to transport liquid sulfur from the main sulfur processing plant to a sulfur granulation plant located 11 kilometers away. It is converted into granules and stored, and then transported by rail to the sulfur processing plant at the ADNOC Ruwais Refining and Petrochemical Complex.

The new pipeline, scheduled to be operational in 2019, serves future sulfur production expansions and contributes to additional sulfur value, a major product of acid gas treatment; and enhances the operational flexibility of existing operations.
